SUMMARY

Software engineer with nearly 2.5 years of experience in full-stack development, specializing in .NET, NestJS, Flutter and data analytics. Skilled in MSSQL, MongoDB and agile methodologies, with a strong focus on building scalable applications and optimizing performance. Passionate about mentoring, leadership, and integrating emerging technologies to enhance collaboration and drive innovation.

PROFESSIONAL EXPERIENCE

Neoscoder Ltd., Dhaka — Senior Software Developer

NOV 2024 - PRESENT

Tech Stack: NestJS, TypeScript, MySQL, .NET Core, MSSQL

- Developing and maintaining robust backend systems using NestJS, MySQL, .NET Core, MSSQL, and TypeORM, ensuring efficient and scalable solutions.
- Contributing to the Store Sales Project, including the implementation of inventory transfer functionality to streamline stock management across locations, improve accuracy, and enhance operational efficiency.

Akij Venture Ltd., Dhaka — Senior Software Developer

MAY 2024 - NOV 2024

Tech Stack: Flutter, NestJS, MongoDB

- Lead the mobile application development team to deliver high-quality software solutions.
- Collaborate with the backend team to integrate and optimize services and APIs.
- Coordinate with the SQA team to ensure rigorous testing and quality assurance.
- Implement backend services using NestJS and NoSQL databases.
- Engage in Agile methodologies and Scrum planning to enhance project management.

EDUCATION

BSc. in Computer Science & Engineering

BRAC University

JAN 2018 - MAY 2022

SKILLS

TypeScript, Dart, Python, PHP, C#,

MSSQL, MySQL, MongoDB, PostgreSQL, Firebase

.NET core, Flutter, NestJs, React, NextJS, React Native, Laravel

RESEARCH

Hridi, N., Farhan, M., Abed, M., Rafsan, M., & Hossain, D. (2022). Demand forecasting on supply chain using ml and nn.

REFEREES

Dr. Muhammad Iqbal Hossain
Assistant Professor @ BRAC University

iqbal.hossain@bracu.ac.bd

Akij Takaful Life Insurance PLC., Dhaka — Mobile Apps Developer

OCT 2022 - MAY 2024

Tech Stack: Flutter, .NET, MSSQL

- Developed cross-platform mobile apps using Flutter.
- Documented development processes and architectural designs.
- Implemented backend services and APIs with ASP.NET and MSSQL.
- Coordinated payment integration with banking institutions and payment gateways.
- Resolved technical issues promptly, ensuring efficient user support.
- Updated backend infrastructure regularly for maintenance and enhancements.

PROJECTS

My Akij Takaful — Life Insurance mobile app

Tech Stack: Flutter

- Developed a cross-platform life insurance app with Flutter, enhancing policyholder and agent experiences.
- Implemented key features such as policy onboarding, digital health cards, tax certificate generation, and claim processing.
- Integrated policy and proposal lists, premium and banca calculators, and agent chain setup for efficient operations.
- Developed agent management tools, including a top-ten ranking system, to track performance.
- Integrated SSLCommerz, Nagad, and bKash payment gateways for seamless premium transactions.
- Provided continuous maintenance, troubleshooting, and enhancements to improve system performance.

Akij API — Backend for Akij Takaful Life Insurance App

Tech Stack: .NET, MSSQL, REST API

- Developed and maintained the backend infrastructure for the Akij Takaful life insurance mobile app.
- Designed and implemented RESTful APIs to handle policy onboarding, claims processing, tax certificates, and digital health cards.
- Worked extensively with stored procedures in MSSQL to optimize database queries and improve performance.
- Implemented authentication, authorization, and role-based access control to enhance security.
- Provided comprehensive API documentation to support frontend development and third-party integrations.
- Conducted regular maintenance, debugging, and performance tuning to ensure system reliability and efficiency.

Fair Value — Akij ecommerce mobile app

Tech Stack: Flutter

- Developed a cross-platform e-commerce mobile app using Flutter, ensuring a smooth and engaging user experience.
- Designed and implemented UI/UX for intuitive navigation, modern aesthetics, and improved user engagement.
- Integrated payment gateways for seamless and secure transactions.
- Optimized app performance for fast loading times, smooth animations, and responsiveness.
- Published the iOS version of the app on the Apple App Store, ensuring compliance with Apple's guidelines.
- Provided ongoing maintenance, bug fixes, and feature enhancements to improve app stability and user satisfaction.

Warranty App — Akij electrical warranty management mobile app

Tech Stack: Flutter

- Developed a cross-platform mobile app for warranty management using Flutter, tailored for retailers.
- Implemented warranty registration with a simple barcode scanning feature to easily start warranties for products.
- Designed a warranty validation and replacement process using barcode scanning for quick and accurate service.
- Streamlined the retailer experience by providing intuitive UI/UX for efficient warranty management.
- Provided ongoing maintenance to enhance functionality, resolve issues, and improve user satisfaction.

Caravan 360 API — Video Editing app backend

Tech Stack: NestJS, MongoDB

- Developed the backend API for the Caravan 360 Video Editing App using NestJS and MongoDB.
- Implemented user authentication with registration, login, and token-based APIs to secure user data and sessions.
- Designed and developed APIs for video storage on the server, allowing users to upload videos and generate shareable links.
- Integrated secure API endpoints for managing user sessions, video uploads, and link generation.
- Provided API documentation to support frontend integration and third-party usage.
- Conducted regular updates, bug fixes, and performance optimizations to maintain a stable backend.

Store Sales — SAAS project

Tech Stack: NestJS, MySQL

- Contributed to the Store Sales Project, implementing inventory transfer functionality to streamline stock management across locations and improve accuracy.
- Collaborated with the frontend team to ensure seamless integration of features and enhance the user interface.
- Designed solutions to enhance operational efficiency by automating stock transfers and syncing data in real-time.
- Developed a secure and scalable backend using NestJS and MySQL, optimizing performance for managing inventory and sales data.
- Supported ongoing maintenance, bug fixes, and improvements to ensure system reliability and smooth operation.
